Continuation Sheet (PTOL-326)

Application No. 09/209,706

Continuation of Disposition of Claims: Claims pending in the application are 54,56,57,59-62,64-83,93,94,96,98-102,104-107,110-114,117-142,144,145,148,154,155,158-160,165,166 and 169-171.

Continuation of Disposition of Claims: Claims rejected are 54,56,57,59-62,64-83,93,94,96,98-102,104-107,110-114,117-142,144,145,148,154,155,158-160,165,166 and 169-171.

- 1. Pursuant to page 1 of the 9-16-2004 response, the examiner will try to get a corrected filing receipt issued.
- 2. Claims 54, 56, 57, 59-62, 64-83, 93,94, 96, 98-102, 104-107, 110-114, 117-142, 144, 145, 148, 154, 155, 158-160, 165, 166 and 169-171 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 56, 57, 64, 159 and 170 as amended define that the metal substrate include metal and an elastomer. As noted in the last office action, however, this raises significant confusion in determining exactly what is being coated - in other words, claims 99 and 104 were previously read to require that it is a metal surface that is being coated. From applicant's response and amendments, it however now is entirely unclear what is surface material is in fact being coated. In other words, the examiner previously read the reference to a "metal substrate surface" in claims 99 and 104 as requiring that it is in fact a metal surface that is being coated (the previous indication of allowability in fact being made with such an understanding). Applicant's response, however now seems to put significant doubt and confusion on whether this is a correct reading of the intended claim scope. As such, all the claims are now considered indefinite, as it is not clear what surface material is in fact being coated. If the reference to a metal substrate is to be read as simply a requirement that there be some metal present, this would then seem to mean that the surface being coated can be in fact almost any material surface - e.g. using such a definition, a piece of wood furniture that has several metal screws would be a "metal substrate" whose wood surface would seem to then be a "metal

substrate surface". The claims have not been read in this manner at this point (and thus no new prior art rejections were made), but clarification of the scope of what material is in fact being coated is necessary and critical, it being stressed that if it is not metal that is being coated, then the applicability of prior art will have to be entirely reassessed.

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Geoffrey L. Knable whose telephone number is 571-272-1220. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Blaine Copenheaver can be reached on 571-272-1156. The fax phone
